DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2-4 and 12-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 2 recites the broad recitation particulate material, and the claim also recites preferably comprised of random structures which is the narrower statement of the range/limitation.

3. Claims 11-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 11 recites the limitation "said outer layer" in lines 3-4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5, 7-15, and 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Tillotson (U.S. 2,120,722). Tillotson discloses the invention as claimed. Tillotson teaches a glove system which could be used for gripping by a fisherman, comprising a glove member having an inner cloth layer, intermediate rubber layer, and outer layer and a plurality of particular material contained within the outer layer for facilitating gripping of a fish. Tillotson discloses a canvas glove with a latex rubber coating 14 (which may consist of more than one coating, thus forming the intermediate and outer rubber layers). The particulate material includes hard fibrous polygonal material dispersed in an irregular, or random, fashion throughout the latex bath, with the particulate material lending a roughened surface to the outside of the glove for improved gripping.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims are rejected under 35 U.S.C. 103(a) as being unpatentable over Tillotson '722 in view of Watanabe (U.S. 4,497,072). Tillotson discloses the invention substantially as claimed. However, Tillotson doesn't teach particulate material comprised of plastic material, specifically polyvinyl chloride. Watanabe teaches a glove with a polyvinyl chloride layer 2 forming projections on the glove's outer surface. Applicant's specification does not provide criticality or unforeseeable results achieved by employing polyvinyl chloride over other hard materials. Therefore, it would have been obvious to substitute the particulate material of Tillotson with the polyvinyl chloride as taught by Watanabe, in order to provide a resilient and inexpensive particle layer.

Conclusion

7. The prior art made of record on the attached PTO-892, and not relied upon, is considered pertinent to applicant's disclosure.
